## Section 16D - Kinetic Molecular Theory

| Gas | $\mathrm{a}\left(\mathrm{L}^{2} \cdot \mathrm{~atm} / \mathrm{mol}^{2}\right)$ | $\mathrm{b}(\mathrm{L} / \mathrm{mol})$ | Gas | $\mathrm{a}\left(\mathrm{L}^{2} \cdot \mathrm{~atm} / \mathrm{mol}^{2}\right)$ | $\mathrm{b}(\mathrm{L} / \mathrm{mol})$ |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Acetic Acid | 17.71 | 0.1065 | Hydrogen | 0.2476 | 0.02661 |
| Acetone | 16.02 | 0.1124 | Krypton | 2.349 | 0.03978 |
| Acetylene | 4.516 | 0.0522 | Mercury | 8.200 | 0.01696 |
| Ammonia | 4.170 | 0.0371 | Methane | 2.283 | 0.04278 |
| Benzene | 18.24 | 0.1154 | Methanol | 9.649 | 0.06702 |
| Carbon Dioxide | 3.640 | 0.04267 | Neon | 0.2135 | 0.01709 |
| Carbon Monoxide | 1.505 | 0.03985 | Nitrogen | 1.370 | 0.0387 |
| Carbon <br> Tetrachloride | 19.7483 | 0.1281 | Oxygen | 1.382 | 0.03186 |
| Cyclohexane | 23.11 | 0.1424 | Propane | 8.779 | 0.08445 |
| Ethane | 5.562 | 0.0638 | Toluene | 24.38 | 0.1463 |
| Ethanol | 12.18 | 0.08407 | Water | 5.536 | 0.03049 |
| Helium | 0.0346 | 0.0238 | Xenon | 4.250 | 0.05105 |

1) Give a brief description as to how temperature affects the kinetic energy of a gas particle.
2) Calculate the root-mean-square speed of a CO molecule and a Ne molecule at $27^{\circ} \mathrm{C}$. State which particle is faster and explain why. Your explanation should be a couple sentences.
3) Draw two graphs:
a) Graph the speed distribution of argon particles at 150 K and 885 K , label your curves.
b) Graph the speed distribution of $\mathrm{N}_{2}$ and $\mathrm{O}_{2}$, label the curves
4) What is the difference between effusion and diffusion?
5) Calculate the real pressure of $0.500 \mathrm{~mol} \mathrm{CCl}_{4}$ and 0.500 mol He in a 2.0 L container at $27^{\circ} \mathrm{C}$. What are the reasons for the difference in actual pressures between the two gases?
6) Why is there such a discrepancy between the $b$ value between cyclohexane and benzene?
7) Which gas from the list above has the largest $a$ value and why? Which gas listed above has the largest $b$ value and why?
